

July 4 – 8, 2022
University of Geneva
Geneva, Switzerland

Call for participants*

[*researchers from all domains of science keen on science outreach]

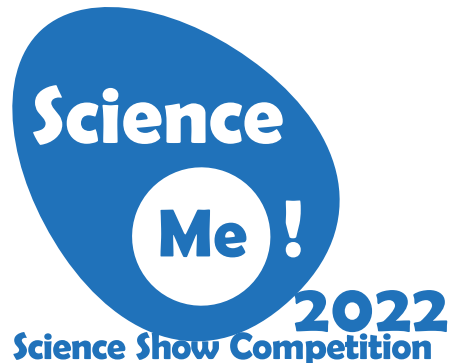

A joint initiative of
Physiscope, Chimiscope, and
Musée d'Histoire des Sciences, aimed at
promoting science communication and
sharing skills on science outreach, as well as
bringing the broad public to evaluate
scientists' performances in communication.

July 9 – 10, 2022
Park of the Perle-du-Lac
Geneva, Switzerland

Call for performers*

[*researchers from all domains of science keen on science shows]

Are you a physicist, biologist, chemist, mathematician, informatician, Earth scientist, pharmacist, astronomer, or whichever scientist? Are you keen on showcasing your science to a large audience of non-specialists?

Then **Science Me!**, the European science show competition, is made for you!

Join us on July 9-10 to convince the broad public –in a 10 min show– that your science is smart and accessible.

The competition takes place in the park of the Perle-du-Lac, Geneva (CH), around the Museum of Science History, during the famous "*Nuit de la Science*", a science fair attracting ca. 35'000 visitors.

Apply until May 31!

Official rules for participants

Science Me! is open to all sciences. Each of the participating teams (1-2 scientists per team) will give a single show of 10min, in English or French. Teams –anonymous during their show– will be evaluated by the public (applause-meter) and by a jury of specialists in science communication. The jury will assess pedagogical and artistic input of shows and their scientific relevance, the interactivity with the public, the clarity of the concepts presented, and the respect of safety regulations. Prizes will be awarded to the top 3 teams during a closing ceremony on July 10, 17h.

Conditions of participation

A maximum of 12-15 teams will be invited to the competition after review of their application. Participation is free-of-charge, including lodging. Upon motivated request, the organisers will provide financial support for travel expenses and/or for specific facilities.

How to apply?

Apply on <http://scienceme.unige.ch> not later than May 31.

Contact ScienceMe@unige.ch for additional information.

Science Me! is an initiative of the **Chimiscope**, chemistry outreach platform of the University of Geneva, and of the **Musée d'Histoire des Sciences**, city of Geneva.
